## Compact cylinders Series 32 Tandem and multi-position versions

Double-acting, magnetic, ø 25, 40, 63, 100.

The cylinder Series 32 Tandem and multi-position versions are, thanks to their compactness, suitable to be installed within confined spaces. They can be used in conjunction with the same mounting elements of other standard cylinders DIN/ISO 6431NDMA 24562 (Series 60/61).
» Compact design
" Wide variety of models available in different diameters In compliance with ISO 21287

The extreme compact Tandem version allows to obtain up to 2 times the force of a normal cylinder, while the multi-position version allows to obtain up to three positions with only one cylinder.

## GENERAL DATA

| Construction | compact profile |
| :---: | :---: |
| Operation | double-acting, magnetic |
| Material | body and end-blocks = anodized AL <br> rod = rolled stainless steel AISI 303 <br> piston $=$ anodized AL <br> rod seal, OR end-block and piston seal $=$ PU |
| Mounting | with threaded holes on the end blocks flange - feet - trunnion |
| Strokes min. and max. (1) Multiposition | Series 32F, $32 \mathrm{M} \varnothing 25=5-300 \mathrm{~mm}$ (dimension x 2 ) <br> Series 32F, 32M Ø 40-63=5-400 mm (dimension x2) <br> Series 32F, 32M Ø $100=5-500 \mathrm{~mm}$ (dimension x2) |
| Strokes min. and max. (1) Tandem | Series 32F, 32M Ø $25=5-80 \mathrm{~mm}$ <br> Series 32F, 32M Ø 40-63-100=5-100 mm |
| Operating temperature | $0^{\circ} \mathrm{C} \div 80^{\circ} \mathrm{C}$ (with dry air $-20^{\circ} \mathrm{C}$ ) |
| Operating pressure | $1 \div 10$ bar |
| Fluid | clean air, without lubrication. If lubricated air is used, it is recommended to use oil ISOVG32. Once applied the lubrication should never be interrupted. |
| Operating speed | $10 \div 1000 \mathrm{mmlsec}$ (without load) |

(1) the minimum stroke for the use of the sensors is 10 mm .
